

Blue Ridge Series

Blue Ridge Waterfalls are fully finished cast rock pieces, made with FRC, a strong but lightweight concrete. Four color patterns are available. Touch Up kits are available to repair damaged edges or to add accent colors. send questions to info@ricorock.com

Unlike our Modular waterfalls most of the boulders in this series are hollow. They should be secured with construction adhesive or a rich mortar mix. The caulking should be the type used to bond blocks or bricks. Mortar repair comes in several colors and can be used to seal joints.

Small cast rock pieces that come with the kit can be secured to the base pieces to hide joints and divert water.

The front face of the waterfalls and boulders have a 3-4 inch notched lip that makes the waterfalls seem bigger and is designed to hide existing coping and take the rock close to the water level of the pool.

They will not extend below waterline like our Modular notched boulders and coping/waterline. This lip can be cut with a grinder type tool if needed.

The source rock for all waterfalls come plumbed with 1 1/2" pvc. This will be exposed on the backside, small rocks can be used to hide the pipes.

The top source rock for the 5 Piece Ledger needs to be supported by one of the small boulders or a concrete block.

3 Piece Bubbler

Plan View

Basin is 21" high

1 1/2" pvc pipe

8 ft

46"

The basin comes cut to fit over the ledger piece. Sealing the overlap of the pieces is needed to prevent seepage.
